#### **Data Flow Diagrams:**

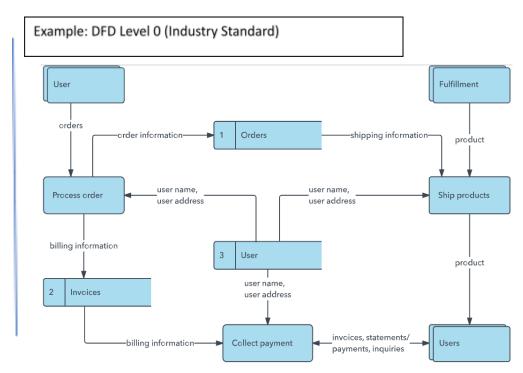

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

#### **Example: (Simplified)**

## Flow

- User configures credentials for the Watson Natural Language Understanding service and starts the app.
- 2. User selects data file to process and load.
- 3. Apache Tika extracts text from the data file
- 4. Extracted text is passed to Watson NLU for enrichment.
- 5. Enriched data is visualized in the UI using the D3.js library.

### **User Stories**

Use the below template to list all the user stories for the product.

| User Type                  | Functional<br>Requirement<br>(Epic)                           | User Story<br>Number | User Story / Task   | Acceptance criteria   | Priority | Release  |
|----------------------------|---|----------------------|---|---|----------|----------|
| Customer<br>(Mobile user)  | Registration  | USN-1                | As a user, I can register for the application by entering my email, password, and confirming my password. | I can access my account / dashboard   | High     | Sprint-1 |
|                            |   | USN-2                | As a user, I will receive confirmation email once I have registered for the application                   | I can receive confirmation email & click confirm  | High     | Sprint-1 |
|                            |   | USN-3                | As a user, I can register for the application through Facebook  | I can register & access the dashboard with Facebook Login                               | Low      | Sprint-2 |
|                            |   | USN-4                | As a user, I can register for the application through Gmail   |   | Medium   | Sprint-1 |
|                            | Login   | USN-5                | As a user, I can log into the application by entering email & password                                    |   | High     | Sprint-1 |
|                            | Dashboard   |                      |   |   |          |          |
| Customer (Web user)        | Enable<br>Country-wise and<br>Region-wise Data<br>Exploration | USN-6                | As a user, I want to filter countries by region so I can compare them effectively.                        | Filters for regions are present, responsive, and update the visuals without delay.      | High     | Sprint-1 |
| Customer (Web user)        | Enable Country<br>Comparison                                  | USN-7                | As a user, I want to compare two countries sibe-by-side across all 12 indicators.                         | Selected countries display adjacent indicator scores for easy comparison.               | High     | Sprint-1 |
| Customer Care<br>Executive | Simplify Technical<br>Terminology                             | USN-8                | As a support exec,I want clear labels so I can explain the indicators to users.                           | Each technical term has a simpler label and tooltip description visible on hover.       | Medium   | Sprint-2 |
| Administration             | Maintain<br>Dashboard<br>Availability                         | USN-9                | As an admin, I want the dashboard to remain online and accessible at all times.                           | The dashboard is publicly available 24/7 with no access restrictions or loading errors. | Medium   | Sprint-2 |

| User Type           | Functional<br>Requirement<br>(Epic) | User Story<br>Number | User Story / Task   | Acceptance criteria   | Priority | Release  |
|---------------------|-------------------------------------|----------------------|---|---|----------|----------|
| Customer (Web User) | Improve user<br>Experience          | USN-10               | As a user, I want a clean and user-friendly layout to navigate data easily.     | Dashboard layout is organized by pillars with consistent chart formatting and responsive interaction. | High     | Sprint-1 |
| Customer (Web User) | Extend<br>Dashboard<br>Reusability  | USN-11               | As a user, I want to revisit or share the dashboard later for future reference. | A shareable link is clearly available, and public access is ensured without login or expiration.      | Medium   | Sprint-2 |
